

I'm a single Parent of a 13 Year old child living in Zebulon North Carolina, in the spring of 2022 I found a card from a detective Zeke Morse requesting a callback. I did call him and he asked me about three Instagram accounts that were involved in child porn and were traced back to my home ip address according to the detective.

I told him that I have no knowledge of said accounts which is the truth of course and I was very surprised how such a thing could happen. the accounts according to the detective used my wifi network sometime back in 2020 which at the time I had all my 3 sons living with me after their mother suddenly just walked away in July 2018 because of drug, alcohol and infidelity issues and they were teenagers, he asked

who lived with me back then and also asked for her number so i gave him my ex wives since the older 2 have moved with her and it was only me and my youngest son who is now 13 year old.

He then said this seems more of "parenting" issue and he will talk to them and likely to close the case. I did notice a few months later my internet acting strange i had to make calls to the internet provider a couple of times but I didn't think much of it he probably put me under surveillance which is okay with me.

The subject on the other hand is very random and unexpected, such a disturbing subject to anyone especially for a parent. and it's the very same reason how I know who my attacker is since i absolutely dont have any interactions or issues with

anyone including family that were involved i havent talked to or seen in years. the context and nature of the actions taken against me made it very clear someone has been building an entire case and and supporting framework. I did have some harassment by the local police back in 2017 when wife then had affairs with a couple of officers.

A case based on fabricated and digitally manipulated events and guided actions in addition to the manipulation and Coercion on my 12 year old child after posing as a peer and talking to him online and somehow manipulating him not only in participating but into harming himself and me by granting access, distracting me and ultimately on August 17 2023 insisting on having device unlocked as we were getting gassed in the car possibly to unknowingly

killing us both thinking he was about to save us.

My son show me a ghost app that quickly started to say things that are unsettling at first I thought someone is watching then it said things from my childhood that nobody would know except someone who grew up with me which is the second clue, my estranged sister and her familys cooperation later became evident he had spent some time talking to her and my ex wife there is no doubt about it.

In the car my son asked for my phone unlock code and I said I forgot it since I have changed it so many times and intentionally turned it off and dropped it between the seat and middle console.

Stopped the car and got water after calling 911 and getting blocked once, they apparently wanted me to turn the android phone back on, and from looking at applications manifest the gas was only stage one. We met an EMS at a gas station and they checked us out and said we were fine.

An hour after we got home, the place didn't look right and I realized someone has been there possibly searching, 5 or 6 police vehicles pulled into the driveway some regular uniforms, some tactical similar to a driver of a jeep wrangler during the car ordeal driving next to me making eye contact while his hand on a holstered gun on his passenger seat typical organized crime street gangs style, and another getting closer telling me I have a flat or low

air they were trying to have us wreck and I believe the gas was supposed to be followed by a firey crash as the Google auto and gms applications on my Android device suggested. " send heartbeat" "matchlight" and exposure callback.

They showed up, I didn't call them they asked what happened and then why would that happen to a "nobody" then asked 9f I believed in the "paranormal" and left.

A few minutes later they came back asked if my son can go spend the night at his estranged mother who also provided intimate information through that ghost apps that only she knows from being married for 17 years.

I said okay and I haven't been able to see him for more than 8 months only one time

and he isn't saying anything almost trying to deny the entire incident and I didn't want to press.

He was taken before I had the chance to talk to him I was making dinner and planned on discussing the matter while eating dinner.

The next morning on August 18 2023, I woke up to another officer I believe sheriff he put me in handcuffs and took me into mandatory commitment he said my uncle filed a petition out of concerns for my well being and being a danger to myself or others, a single parent who was attacked on the road and intimidated under severe stressful situation and yet made it home safely. It is also worth mentioning I do NOT have an uncle and at the hospital I was humiliated, stripped and forcefully given a

Foley catheter that caused me permanent damage and pain. I was looked at with disgust and treated badly also given some hormone tests and I'm not sure what else since I was kept there for 5 days, not only that but a doctor said I was set to be admitted to a mental hospital as inpatients but they didn't have room at the time the actions are under various non related regulations and agencies but with a consistent underlying language that facilitate them.

This is what happened and I have been trying to file a report unsuccessfully with related and un related agencies, where do you go? Also contacted lawyers and no response, driving to places giving me infinite loops on Google maps and finally they destroyed my vehicles, emails also attempts to to collect dna through

breaking into my home and even place of work twice they shattered the store front so i get a call from the alarm company.

financial transactions all very difficult to live a normal life. There were so many other attacks and it's worth mentioning these ghosts apps which were mentioned to me as part of the plan they receive messages through cloud to direct message service by Google, a deprecated service that apparently was utilized in addition to Google Firebase C2DM and sent to give a sense of whatever but to me it gave a clear indication of invasive surveillance especially when they were telling me what is my son doing privately, he is an innocent 12 year boy.

The plan became evident some investigation was going on where that's if it

even started they pick an easy target, frame, kill and accuse and i realize now there is no plan of fixing this because it simply is bad if not the worse I can't think of any civil right or constitution or law that hasn't been humiliated and aggressively violated repeatedly with no signs of remorse or any thread of conscious. The only solution is for me to die and they did try but I'm worried one day they will go after my boy.

So I left the country and I'm denouncing the internet for now going on paper to every united nation like organization I can physically get to, because I just also realized all my posts and view counts are fake and each move made was supported with a new ammendment or legislation.

I'm asking your help in getting my son out

of there, he is not I'm good hands and I'm unable to know any details about him, his health but I believe he is in danger even if its just the possibility of becoming someone like that environment that it truly most evil, hateful, corrupt and vile.

Sincerely,
Rami Al Nasa
